Experts

60+

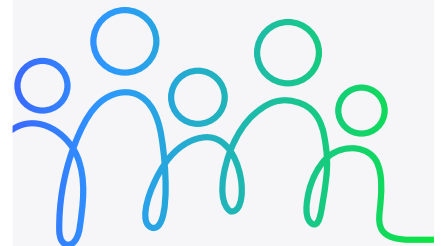

Facts

With 16+ years of experience in consulting, software development, and process automation, the company provides end-to-end digital transformation — from design to implementation and support. A proud IT Park Uzbekistan resident, driving innovation through technology.

Mission and vision

We help organizations lead digitally by building solutions that boost efficiency, transparency, and sustainability. Our goal is to be a trusted tech partner — solving complex challenges and creating products tailored to each client's needs.

Talented minds
united by one goal

INTELLIGENT ENTERPRISE PLATFORMS (ERP)

01

Virtual Office

Virtual Office — a digital ecosystem for managing HR, documents, and operational workflows. Includes modules for HRM, DocFlow, Task Management, Project Management, LMS, and a corporate chat with video conferencing, audio/video calls, messaging, and file sharing (FTP).

CMMS

CMMS — a computerized maintenance management system implemented in manufacturing plants to reduce downtime and improve equipment reliability.

EdSpire

Edspire — a digital platform for managing educational institutions with modules for performance tracking, scheduling, HR, and internal reporting.

Industrial Solutions

Industrial Solutions — automation of production, warehouse, and financial operations for industrial and logistics companies.

DLTex

DLTex — an intelligent enterprise platform for managing production cycles, procurement, and logistics in the textile industry.

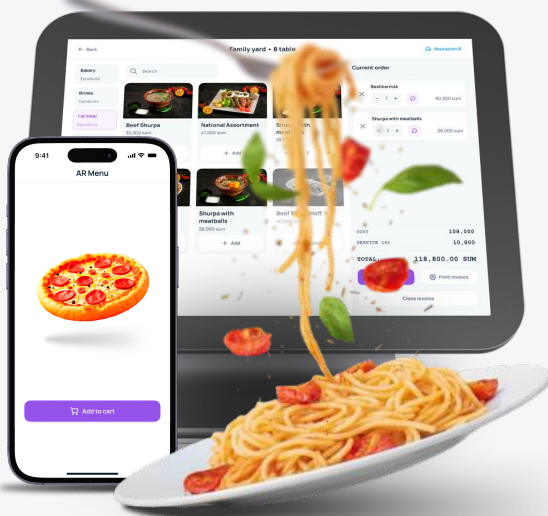

02

CLOUD AND SAAS PLATFORMS

ChefPOS

ChefPOS — a modular POS platform for restaurants and retail chains, featuring analytics, franchise management, and integration with online payment systems.

Restaurant management at a new level

TechFlow

TechFlow — a software suite for managing automotive service centers, work orders, and warehouse operations.

Auto service and spare parts management

IOT AND ACCESS CONTROL SYSTEMS

03

GateX

GateX — an intelligent access control solution (Face ID, RFID, ANPR) used in industrial, commercial, and administrative facilities.

Integration

Integration with hardware devices and IoT sensors for real-time monitoring of production processes.

04

ARTIFICIAL INTELLIGENCE AND ANALYTICS

AI Voice-to-Text

AI Voice-to-Text — an Uzbek speech recognition and automatic transcription model

Analytics and Forecasting

Analytics and Forecasting Modules — tools for visualization, KPI tracking, and management reporting.
